

Patrick Nguyen

Product Engineer · Design + Code + Business

main@patricknguyen.dev · github.com/patricknguyendev · United States (PT) · Open to full-time

SUMMARY

Computer Science major and Business minor who designs, builds, and ships product end-to-end. Five years turning ambiguous requirements into clear, usable interfaces — then implementing them in React, Next.js, and TypeScript. I care about the build passing as much as the pixels matching, and about why a feature moves the metric.

SKILLS

Engineering: React · Next.js · TypeScript · JavaScript · Tailwind CSS · Node.js · Git · Accessible UI

Design: Product UI/UX · Figma · Design systems · Interaction & flows · Adobe Suite · Framer

Product: Product sense · Prioritization · Metrics & tradeoffs · Stakeholder clarity

EXPERIENCE

UX Designer — Tummoc

2022 — Present

Designed and refined product flows for a mobility platform, focusing on clearer navigation, task completion, and interface consistency.

Freelance UX Designer — Upwork

2022

Delivered focused design support for client projects, translating loose requirements into usable web and app interfaces.

Senior Graphic Designer — AKOI

2020 — 2022

Created campaign and brand assets for growth-focused clients, balancing visual polish with production speed.

SELECTED WORK

Picxele — Gig platform redesign. Reworked gig-discovery surfaces for clearer task flow, trust cues, and dark-theme usability. (*Product UI/UX; private case study available on request.*)

Inyou — Wellness website. Structured the experience around clear content hierarchy, trust-building, and approachable onboarding. (*Website design & positioning; private case study available on request.*)
